2. Acquire the knowledge of Ancient Indian method of teaching Sanskrit language, literature & grammar.
3. Master the skills of pronunciation and recitation in Sanskrit chunks and verse.

4. Appreciate Sanskrit literature and understand the role and importance of Sanskrit as classical language and worth preserving.
5. Master the skills and techniques of teaching Sanskrit language and literature.

Pedagogy of mathematics

After completion of the course the students will be able to -

1. Understand the nature, scope and historical perspective of Mathematics.
2. Understand the aims and objectives of teaching Mathematics.
3. Master the skills, methods, approaches and techniques of teaching mathematics.
4. Master the process of evaluation to assess the achievement of learners in Mathematics.

Pedagogy of Physical Science

After completion of the course the students will be able to –

1. Understand the nature and scope of Physical Science.
2. Acquire and master the skills of teaching Physical Science.
3. Acquire the mastery in laboratory management of Physical Science laboratory.
4. Devise pedagogical strategies for teaching Physical Science.

Pedagogy of Biological Science

After completion of the course the students will be able to -

1. Understand the concept, aims and objectives of teaching Biological Science.
2. Understand the role of Biological Science in the development of skills & attitude for social living.
3. Master the skills, approaches, methods and techniques of teaching Biological Science.
4. Acquire the qualities of effective Biological Science teacher.

Pedagogy of Geography

After completion of the course the students will be able to -

1. Understand the nature and scope of teaching Geography.
2. Understand the importance of teaching geography.
3. Understand the relationships of Geography with other social sciences.
4. Acquire skills, approaches, methods and techniques of teaching Geography.

Pedagogy of History

After completion of the course the students will be able to -

1. Understand the nature and scope of teaching History.
2. Understand the role and importance of teaching History.
3. Understand the relationships of History with other social sciences.
4. Acquire skills, approaches, methods and techniques of teaching History.

Pedagogy of Civics

After completion of the course the students will be able to -

1. Understand the nature and scope of teaching Civics.
2. Understand the role and importance of teaching Civics.
3. Understand the relationships of Civics with other social sciences.
4. Acquire skills, approaches, methods and techniques of teaching Civics.

Pedagogy of Economics

After completion of the course the students will be able to -

1. Understand the nature and scope of teaching Economics.
2. Understand the role and importance of teaching Economics.
3. Understand the relationships of Economics with other social sciences.
4. Acquire skills, approaches, methods and techniques of teaching Economics.

Pedagogy of Commerce

After completion of the course the students will be able to -

1. Understand the nature and scope of teaching Commerce at the higher secondary level.
2. Understand the role and importance of teaching Commerce at higher secondary level.
3. Understand the relationships of Commerce with other social sciences at higher secondary level.
4. Acquire skills, approaches, methods and techniques of teaching Commerce at higher secondary level.

Pedagogy of Social Science

After completion of the course the students will be able to -

1. Develop an understanding of nature of social sciences, both of individual disciplines comprising social sciences, and also of social sciences as an integrated/interdisciplinary area of study.
2. Acquire a conceptual understanding of the processes of teaching and learning social sciences.

3. Enable student teachers examine the prevailing pedagogical practices in classrooms critically and to reflect on the desired changes.
4. Acquire basic knowledge and skills to analyze and transact the social sciences curriculum effectively following wide-ranging teaching learning strategies in order to make it enjoyable and relevant for life.
5. Sensitize and equip student teachers to handle social issues and concern in a responsible manner that is preservation of the environment, disaster management, promoting inclusive education, preventing social exclusion or children coming from socially and economically deprived background and saving first delegating natural resources (water, fossils, fuel etc.)

TC-204: Assessment of learning

After completion of the course the students will be able to -

1. Gain a critical understanding of issues in assessment and evaluation (from constructivist paradigm).
2. Become cognisant of key concept, such as formative and summative assessment evaluation and measurement, test and examination.
3. Be exposed to different kinds and forms of assessment that aid student learning.
4. Become the use of wide range of assessment tools and learn to select and construct this appropriately.
5. Evolve realistic comprehensive and dynamic assessment procedure that are able to keep the whole student in view.

P-205: Drama and Art in Education: (EPC-2: Practicum)

After completion of the course the students will be able to -

1. Understand the concept of drama in Education and as pedagogy.
2. Organize drama as an activity on the stage: solo, group etc.
3. Understand and appreciate Indian and regional drama traditions.
4. Review and assess drama as a performing art.
5. Understand the concept of Visual Art and Craft in the propagation of Education.
6. Understand Visual Art and Craft as pedagogy.
7. Acquire knowledge of visual art and craft, its different forms, basic resources and their use.
8. Acquire knowledge of Indian Contemporary Art and artists and appreciate their work of art.
9. Review and assess Visual Art and Craft.

P-302: School Internship Report (Practice of Teaching: Practicum)

After completion of the course the students will be able to -

1. Understand and experience the actual teaching-learning situation in school.
2. Prepare a lesson plan and apply it during her teaching in actual classroom situation.
3. Use the teaching skills useful to teach a particular topic of the given subject.
4. Prepare teaching aids to make teaching more effective, interesting and easy for students to understand the concept of the content taught.
5. Act in the class as a facilitator, classroom manager and an able observer to facilitate, manage and identify learning situations.
6. Prepare test to achieve the objectives of learning.
7. Identify, Study and find viable solutions of a classroom issues through action research.
8. Detect and solve student's problems through case studies.
9. Prepare timetable, blueprint, maintain register and manage class.

P-303: Assessment of Practice Teaching in Selected Subject (Practicum)

After completion of their practice teaching students will be able to -

1. Perform their teaching skills, professional attitude, aptitude, gesture, posture, body language, facial expression, classroom management, social skills, teaching ability, knowledge and control over the subject content.

TC-401: Gender, School and Society

After completion of the course the students will be able to -

1. Understand the psychological and sociological perspective of gender.
2. Acquire knowledge of women education and law.
3. Understand the importance of gender sensitization for the healthy growth of society.
4. Understand the relationship among gender, school and society.
5. Understand the role of education in minimizing gender disparity.

TC-402: Knowledge and Curriculum (Part-2)

After completion of the course the students will be able to understand -

1. Interplay of language and society.
2. The development process of language acquisition.
3. Function of language and how children use them as a tool at different developmental stages.
4. Language diversity in classrooms.

5. Classroom discourse, tools of learning and reading in context areas.

TC-403: Creating and Inclusive School

After completion of the course the students will be able to -

1. Demonstrate knowledge of different perspective in the area of education of children with disabilities.
2. Reformulate attitudes towards children with special needs
3. Identify needs of children with diversities
4. Plan need-based programmes for all children with varied abilities in the classroom
5. Use human and material resource in the classroom
6. Use specific strategies involving skills in teaching special needs children in inclusive classrooms
7. Modify appropriate learner-friendly evaluation procedures
8. Incorporate innovative practises to respond to education of children with special needs.
9. Contribute to the formulation of policy
10. Implement lost pertaining to education of children with special needs.

Optional Courses

TC-404 A: Vocational/Work Education

After completion of the course the students will be able to -

1. Have sufficient knowledge of the course.
2. Select teaching strategies, teaching aids with notes.
3. Understand nature of the work, scope or area.
4. Perform socially useful productive work.
5. Develop the concept of work education in general education suitable for India.
